SPRAYTECS TECHNOLOGIES LTD

WM12X211 nozzle Datasheet. Low Pressure Water Mist nozzle, Open, Non-Automatic. Suitable for Low Pressure Water Mist fixed systems.

1/3

Description

The SPRAYTECS WM Series WM12X211 are low pressure water mist, open (nonautomatic) nozzles suitable in total flooding water mist systems for fire protection of machinery spaces, special hazard with flammable fuels (see details in Applications section here below), turbines, special hazard of machinery spaces, and insulated combustion turbines with volumes up to 5000 m3. These nozzles are part of fire protection systems designed with different parameters depending on kind of hazard, making possible the optimization of the system by the system's

The SPRAYTECS WM Series WM12X211 nozzles can be supplied in various materials and different thread types.

Tests and Approvals

The SPRAYTECS WM Series WM12X211 are low pressure water mist nozzles, expressly designed and currently under test for a wide range of fire hazards and special hazards, as defined per technical specification standards EN ISO 19353:2016, EN 14972-1 2021 OH-1 and OH-3, FM5560 appendix E and F.

Further standards will be mentioned after succesfully test passed.

General Description									
Nozzle code:	WM12X211								
Min. water pressure:	3 Bar								
Max. working pressure:	16 Bar								
Max Nozzles spacing:	3 m x 3 m								
Distance to wall:	1,5 m								
Max Height (max):	10 m								
Min Water density:	1,39 mm/mq/min								
Max Water density:	>18 mm/mq/min								
K-factor (metric):	6,3 lpm @ 1 bar								
Drop size:	Dv90 < 300 μm								
Weight:	Min 0,06 Kg to Max 0,18 Kg								
Nozzle body material:	Aluminum/ Brass / SS316/ SS303/ SS304								
Thread:	1/2" BSPT/BSP/NPT								
Micro-nozzles material:	SS316								

WATER MIST NOZZLE 1/2" - for LOW pressure systems

DIMENSIONS & WEIGHT DATA:

SPRAYTECS TECHNOLOGIES LTD

WM12X211 nozzle Datasheet. Low Pressure Water Mist nozzle, Open, Non-Automatic. Suitable for Low Pressure Water Mist fixed systems.

3/3

Applications

Oil tanks and oil pumps, combustion engines, fuel filters, generators, transformers, gear boxes, drive shafts, lubrication skids, diesel engine driven generators, exposed or insulated combustion turbines, and any equipment using liquid hydrocarbon fuel and/or hydraulic, heat transfer, lubrication fluids with volatility less than or equal to heptane; enclosures with incidental use or storage of hydrocarbon ignitable liquids (also defined flammable liquids) of quantity not exceeding 105 gal (400 L).

Installations

WM12X211 water mist open nozzles must be installed as a deluge system in an open pipework.

Nozzles should be located maximum 100 mm below the ceiling. Components and pipes should be cleaned from debris, shavings and impurities and also welded items should be cleaned. The professional careful installer shouldn't get sealant into the pipe system. It should be checked extensively that the components are positioned correctly according to the system plans and specifications. All components should be securely fastened to rigid, strong structures by approved rules. The fire protection system shall not consist of material combinations with risks of galvanic corrosion system pipes and other system components. The system should use pipes and system components in stainless steel, AISI 304 or AISI 316, aluminum or copper alloys as to minimize risk of corrosion and clogging of the pipes and other system components.

It must never be used components with iron parts and other highly corrosive materials sometime used in traditional sprinkler systems. System components ever shall be according to the local applicable standards, and be accepted by authorities having jurisdiction.

Cautions

The WM12X211 nozzles shall be installed in locations not containing materials which may produce strong reactions or significantly hazardous materials when reacting with water. Moreover they should be installed in locations where nozzles are not easily shocked and/or could receive physical damage.

Contact

For further information on WM12X211 nozzles, please contact us at address: sales@spraytecs.com
